

# Choosing an **UPS Manufacturer** is like Choosing the **Right Partner for Formula E**

Competing to see who creates what is not invented yet first is exciting, like competing in Formula E. For that reason, buying an UPS for your unique critical installation requires you to partner with the right UPS Manufacturer.

**1. Innovation for the Most Stringent Requirements:** the right partner will listen to the specific needs and adapt the technology to a customized solution.

**2. High Quality Equipment.** an UPS with robust components and batteries is the secret to a 99.99% availability of your critical facility.

**3. Certified Maintenance and Repairs:** the right manufacturer will offer the certified services for maintenance and repairs you will need to guarantee runtime of your application and return on investment for the company.
