

## Riello UPS announces its sponsorship of Andretti Global in the NTT INDYCAR SERIES

*A new impetus for the Verona-based company's activities in North America*

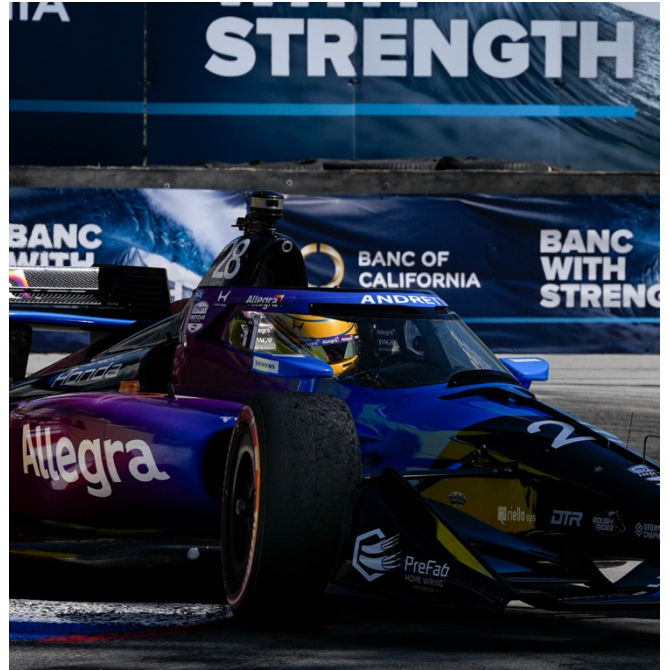

**Legnago (VR), 20 May 2026**— Riello UPS is delighted to announce a new and prestigious partnership in the world of motorsport: its sponsorship of Andretti Global in the NTT INDYCAR SERIES, one of the world's most iconic and competitive motor racing championships, followed by tens of millions of spectators.

Under this agreement, the Riello UPS logo will feature on the racing suit and as an associate sponsor on the No. 28 Honda of Marcus Ericsson.

Riello UPS's partnership with a leading team such as Andretti Global forms part of the NTT INDYCAR SERIES. This is one of the most popular and technologically advanced racing series in the world, with a format that drives teams and manufacturers to constantly innovate. This partnership aims to strengthen the brand's visibility, positioning and authority on an international scale.

North America is an increasingly strategic region for Riello UPS, where the company is seeing steady growth in its market share and continues to invest in the development of dedicated solutions. This commitment focuses in particular on key sectors such as data centres, healthcare, edge computing and energy-intensive industries. Having been present in the United States since 2016 through its Cincinnati branch – a hub for local services (sales, installation and commissioning, after-sales support, and management of the finished goods and spare parts warehouse) – Riello UPS further strengthened its presence in 2025 with the acquisition of Santa Fe Power Solutions. A strategic move that brings with it assets of great value, including extensive experience in airport security systems, a highly qualified technical team and comprehensive, responsive coverage across the United States for critical power protection solutions.

*“The INDYCAR world and Andretti perfectly embody the values of excellence and innovation that also guide Riello UPS. Their shared Italian heritage, of which founder Mario Andretti has always been very proud, further strengthens this bond. “This partnership represents a strategic lever for increasing visibility and credibility in a market that is key in terms of size and potential, where Riello UPS recorded a 200% increase in the period 2023–2025, with forecasts for 2026 indicating a further 30% growth.” “The focus on compatibility with the most widely used monitoring tools also ensures*

*operational continuity and maximises the value of existing technological investments”* said Roberto Facci, Sales Director at Riello UPS.

*“We’re excited to welcome Riello UPS to the Andretti Global family. The NTT INDYCAR SERIES has so much momentum right now, so it’s a great time for a company like Riello UPS to join the sport. We’re proud to represent their brand on the No. 28 Honda and look forward to building a strong partnership together.”* said Marcus Ericsson, driver for Andretti Global.
